

Ilija Radivojević

Front End Software Engineer

ilija.radivojevic237@gmail.com • ilijaradivojevic.com • github.com/IlijaRad

As a passionate software engineer, I thrive on crafting transformative digital experiences that empower people to achieve the previously unattainable. My drive for continuous learning keeps me on the cutting edge of technology, and there's nothing more fulfilling than leveraging my skills in this ever-evolving landscape. Committed to constant growth, I push boundaries daily, striving for innovation and improvement.

Work Experience

Front End Software Engineer (Infostud 3 d.o.o, Subotica) Feb 2023 – Present

Worked on a front end for an app with 1.3m+ users (poslovi.infostud.com), worked on legacy code and rewrote it into Next.js/Typescript.

- Reviewed the requirements for the application and the interface designs
- Actively participated in daily meetings and planning sprints while trying to come up with best solutions and time estimates for problems
- Transformed Figma designs into responsive UIs
- Worked closely with Product managers, UI/UX designers, back end developers and other front end developers
- Communicated with back-ends powered by GraphQL

Front End Software Engineer (Quantox Technology d.o.o, Remote) Dec 2021 – Feb 2023

Developed a front end for a dating app from scratch with Next.js and Material UI worked on both internal and external projects.

- Reviewed the requirements for the application and the interface designs
- Actively participated in daily meetings and planning sprints while trying to come up with best solutions and time estimates for problems
- Transformed Adobe XD and Figma designs into responsive UIs
- Worked closely with Project managers, UI/UX designers, QA testers and back end developers
- Communicated with backend built with REST
- Taught myself new technologies on the fly such as Storybook, SWR, Typescript

Front End Software Engineer (Freelance work, Remote)

Oct 2020 – Nov 2021

Built websites for small businesses and projects for students.

- Built a website for a small gardening business using HTML, CSS, PHP
- Built a static brochure wordpress website for a small store that sells fishing equipment
- Built websites for college student projects using HTML, CSS, PHP, JQuery, Javascript, Wordpress, React, Node, Express, MySQL, PostgreSQL
